Kilobyte - \$100

NAME ON THE SHIRTS

We are always in need of bolts, nuts and fasteners. Extruded aluminum and aluminum bar. We always are in need of replacing screwdriver bits, drill bits, and saw blades. We normally transport ourselves to our events across the state requiring fuel for both vehicles and people. Caffeine....Caffeine makes up half the robot. Most robots will have a part cost per year between \$6000 to \$8000. There is also normally a \$6000 entry fee for the base season and another possible \$10,000 for State and World competitions, not including any room and board we would need. And we are very much open to working with used equipment. We have many abilities to repurpose and refurbish equipment.
